DETAILED ACTION

This is in response to amendment to application no. 09/852,717 filed on January 28, 2008.

Claims 1-6 are presented for examination. Claims 7-39 have been cancelled.

Election/Restrictions

Applicant's election without traverse of claims 1-6 in the reply filed on January 28, 2008 is acknowledged.

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Nakamura et al (US Patent 5,636,042).

In re claims 1-2, Nakamura et al discloses a panel for a liquid crystal display, comprising: an insulating substrate (300) having a flat surface; a transparent electrode (341) formed on the flat surface of the insulating substrate; a black matrix (311) formed on the transparent electrode; and a protrusion (413) formed on the black matrix (Figure 2; column 4 – column 5).

In re claim 3, the claimed invention is a product-by-process claim and even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." *In re Thorpe*, 777F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985).

In re claims 4-5, Nakamura et al discloses the black matrix (311) is a laminate of a chrome oxide film and a chrome film (column 4, lines 60-65).

In re claim 6, Nakamura et al discloses a color filter (321) formed between the insulating substrate (300) and the transparent electrode (341) (Figure 2; column 4, line 65 – column 5, line 3).

Claims 1-4 and 6 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Inoue et al (US Patent 7,136,140). In re claims 1-2, Inoue et al discloses a panel for a liquid crystal display, comprising: an insulating substrate (22) having a flat surface; a transparent electrode (26) formed on the flat surface of the insulating substrate; a black matrix (34) formed on the transparent electrode; and a protrusion (20) formed on the black matrix (Figure 4; column 11 – column 12).

In re claim 3, the claimed invention is a product-by-process claim and even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." *In re Thorpe*, 777F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985).

In re claims 4, Inoue et al discloses the black matrix is a chrome film (column 11 – column 12).

In re claim 6, Inoue et al discloses a color filter (G, B, R) formed between the insulating substrate (22) and the transparent electrode (26) (Figure 4; column 11 – column 12).

Response to Arguments

Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. Song et al (US Patent 6,710,837)
- b. Takizawa et al (US Patent 6,573,964)
- c. Takeda et al (US Patent 6,724,452)

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ANTHONY HO whose telephone number is (571)270-1432. The examiner can normally be reached on M-Th: 8:30AM-7:00PM EST.

Application/Control Number: 09/852,717 Page 6

Art Unit: 2815

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kenneth Parker can be reached on 571-272-2298. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
